

Is a Hot Dog a Sandwich?

Project 0 DS 4002

By: Tarana Ahad, Emily Friedman,
Ciara Fasullo

Motivation

A group of passionate scholars who wanted to uncover the truth behind the most pressing question of the 21st century.

The internet appears to have very polarizing opinions on the matter, so we wanted to see if the UVA student body could put the debate to rest.

Hypothesis

More than half of UVA full-time undergraduate students believe that a hot dog is not a sandwich.

$\neq$

Data

Entries: 79

Columns: 4

- **Timestamp** - auto-filled based on completion time (chr)
- **Student status** - Full-time/Part-time binary answer (yes/no)
- **Academic year** - first, second, third, fourth (chr)
- **Do you believe a hot dog is a sandwich?** - binary answer (chr) (yes/no)

A Google form survey sent out to UVA students ➡

Timestamp	Are you a full-time undergraduate UVA student	What year are you?	Do you believe a hotdog is a sandwich?
1/14/2026 14:54:44	Yes	3rd	No
1/14/2026 14:55:14	Yes	4th	No
1/14/2026 14:56:49	Yes	4th	No
1/14/2026 14:58:15	Yes	4th	Yes
1/14/2026 14:58:25	Yes	4th	Yes
1/14/2026 14:58:27	Yes	4th	Yes
1/14/2026 14:58:31	Yes	3rd	Yes
1/14/2026 15:02:11	Yes	3rd	No
1/14/2026 15:02:11	Yes	3rd	No
1/14/2026 15:02:19	Yes	4th	Yes
1/14/2026 15:02:21	Yes	4th	No
1/14/2026 15:02:28	Yes	2nd	No
1/14/2026 15:03:19	Yes	2nd	No
1/14/2026 15:03:34	Yes	2nd	No
1/14/2026 15:03:36	Yes	4th	No
1/14/2026 15:04:39	Yes	3rd	No
1/14/2026 15:05:29	Yes	3rd	No
1/14/2026 15:10:35	Yes	4th	No
1/14/2026 15:12:15	Yes	4th	No
1/14/2026 15:14:01	Yes	2nd	No
1/14/2026 15:17:17	Yes	2nd	No

Analysis Plan

Cleaning the Data

- Confirmed that every student answered all 3 questions
- Removed any response that answered “No” to “Are you a full-time undergraduate UVA student”
- Converted the answers to a CSV file in order to use it for analysis in R

Data Analysis

- Use Chi-squared test to determine significance of results

Data Visualization

- Present data in a bar plot

Results

- Agreement that a hot dog is a sandwich is a minority opinion across all class years
- The 4th-years show both the strongest rejection (“No”) and the largest number who accept (“Yes”), which likely reflects a larger sample size rather than a shift in belief
- A chi-square goodness of fit test showed that significantly more than half of full-time undergraduate UVA students believe that a Hot Dog is not a sandwich ($p < .001$)

Next Steps

- Get a more representative and larger sample
- Eliminate bias by randomizing the sample (rather than using voluntary sampling)
- Come up with more questions to collect more data points
- Create predictive models (e.g. can we predict if a certain undergraduate year is more inclined to think that a hot dog is a sandwich?)

Acknowledgements

- Data was collected from University of Virginia students
- Analysis performed by DS4002 Spring 2026
